## EDUCATION

**University of Central Florida**  
*Bachelor of Science in Computer Science*

Orlando, FL  
Aug 2023 - May 2025

## EXPERIENCE

### Software Engineer Intern

September 2024 - Present

*Leidos*

*Orlando, FL*

- Researched solutions for advancing the field of **spatial intelligence**, focusing on generating complex relationships between visual data and language by leveraging **LLMs**, **Q-Formers**, and **Hugging Face Transformers**.
- Fine-tuned **machine learning** models for **vision-language pre-training**, increasing model efficiency by **35%**.
- Developed **data scraping** tools with **Python**, automating data collection and increasing productivity by **20%**.
- Engineered data through cleaning and preparation for efficient model training, reducing data errors by **15%**.

### Software Engineer

July 2024 - Present

*KnightHacks*

*Orlando, FL*

- Developed a multi-purpose Discord bot with several useful commands to serve a club chat with **3500+** members.
- Wrote an algorithm which validated event data for announcements, increasing club event attendance by **40%**.
- Engineered a website for club registration with **React**, serving **1500+** students and **10+** company sponsors.
- Facilitated development of new tooling architecture, increasing **DX** by **80%** and developer efficiency by **90%**.

### Software Engineer Intern

June 2024 - Present

*Darden*

*Orlando, FL*

- Engineered several **Python** applications for automation, saving **400+** work hours and **\$10000+** per quarter.
- Leveraged several **machine learning** powered packages such as **OpenCV**, **scikit-image**, and **PyTesseract** for use in robust error handling, decreasing errors by **95%**, and increasing application efficiency by **45%**.
- Performed efficient **data engineering**, reducing code complexity by **50%**, and application runtime by **20%**.
- Developed a **Java** desktop application for streamlined application usage, improving **UX** and portability by **100%**.

### Software Engineer Intern

June 2022 - Aug 2023

*Orange County Public Schools*

*Orlando, FL*

- Engineered **PowerShell** applications for automation, optimizing technical support and saving **100+** work hours.
- Identified bottlenecks in technical support processes through **data analysis**, reducing process time by **15%**.

## PROJECTS

### GuitAR | *C#, C++, Unity, Meta SDK, Algorithms, Audio Classification*

- **2nd place winner** of the "Best Overall" category at Knight Hacks 2024, surpassing **100+** submitted projects.
- Developed a highly-interactive, educational mixed reality application for learning and practicing the guitar.
- Designed an **audio classification** algorithm which converts audio frequencies to binary data for note validation.
- Leveraged **C#** to develop songs/lessons and core application logic, and utilized **Unity** for 3D development.

### Insurify | *Python, Next.js, React, TypeScript, PostgreSQL, Prisma, Tailwind CSS, Docker, Flask*

- Built a multi-purpose insurance application which gives quotes based on a car's damage and customer data.
- Leveraged **Python** and **Hugging Face Transformers** to develop an image classification model for car damage.
- Developed a **machine learning** model for estimating insurance quotes based on the quantified car damage data.

### Naavis | *Next.js, React, TypeScript, PostgreSQL, Prisma, Redis, Amazon S3, tRPC, Tailwind CSS, Vitest*

- Developed a location sharing web application which allows users to track locations of group members and devices.
- Wrote an advanced authentication system with **TypeScript** and **Lucia**, allowing third-party and regular sign-in.
- Leveraged **Amazon S3** and **tRPC** queries to store assets, reducing query speeds by **50%**, and latency by **80%**.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, TypeScript, R, C, C++, C#, Java, Go, HTML, CSS, PowerShell, Bash, SQL

**Frameworks:** React, Next.js, Astro, Node.js, Express.js, Tailwind CSS, tRPC, Bootstrap

**Libraries:** scikit-learn, PyTorch, TensorFlow, Keras, NumPy, Pandas, Matplotlib, Flask, Django, OpenCV

**Tools:** Git, GitHub, GitLab, Jira, Confluence, Hugging Face, MySQL, PostgreSQL, SQLite, AWS, Prisma, Redis, Docker, MongoDB, Jupyter Notebook, Figma, Unity, Arduino, Linux, Vitest

**Concepts:** Machine Learning, Full-Stack Development, Computer Vision, Cloud Computing, DevOps, Agile/Scrum
