EDUCATION

University of Central Florida   Orlando, FL
Bachelor of Science in Computer Science   *Aug 2023 - May 2027*

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, C, C++, Go, Java, Python, R, SQL
Frameworks: React, Next.js, Astro, Node.js, Express.js, Tailwind CSS, tRPC, Bootstrap
Libraries: scikit-learn, PyTorch, NumPy, Pandas, Matplotlib, Flask, Django, OpenCV
Tools: Git, GitHub, MySQL, PostgreSQL, AWS, Prisma, Supabase, MongoDB, Jupyter Notebook, Figma

EXPERIENCE

Software Engineer   June 2024 - Present
Darden   *Orlando, FL*

- Pioneered the development of several advanced Python applications for use in expediting and automating employee workflows, saving 400+ employee work hours per quarter and reducing quarterly employment costs by $10000+.
- Leveraged several machine learning powered packages such as OpenCV, scikit-image, and PyTesseract for use in robust error handling, decreasing errors by 95%, and increasing application efficiency by 45%.
- Utilized packages such as Pandas, NumPy, and Matplotlib to perform efficient data engineering and develop concise data models, reducing application complexity by 50%, and application runtime by 20%.
- Developed a Java desktop application to streamline the use of our Python applications, improving employee user experience, software portability, and software maintainability by 100%.
- Wrote a workflow with YAML to perform linting/formatting tasks on push, and wrote extensive documentation.

Software Developer   Jan 2024 - May 2024
Association of Computing Machinery   *Orlando, FL*

- Collaborated with a team of designers and back-end engineers to develop a site advertising the ACM at UCF.
- Developed an admin tool that allows authorized users to manipulate server data directly from the website.
- Developed a REST API with Node.js and Express to route data from a MongoDB server to the front-end.
- Optimized a database querying algorithm, which reduced data fetching and component rendering runtime by 50%.

PROJECTS

Naavis | *Next.js, React, TypeScript, PostgreSQL, Prisma, Amazon S3, tRPC, Tailwind CSS, Vitest*

- Developed a location sharing web application which allows users to track locations of group members and devices.
- Wrote an advanced authentication system with TypeScript and Lucia, allowing for third-party and regular sign-in.
- Leveraged Amazon S3 and tRPC queries to store profile pictures and images for efficient retrieval of said assets.
- Used TypeScript and React to create appealing UI components and ensure responsive design throughout.

Multi-Wordle | *Next.js, React, TypeScript, PostgreSQL, Prisma, Supabase, Node.js, Tailwind CSS, Vitest*

- Developed a rendition of the popular game Wordle, with the addition of four and six letter game modes.
- Used React components, hooks, and props to seamlessly animate elements and develop core game functionality.
- Leveraged Node.js and Prisma to query a PostgreSQL database hosted on Supabase to access 10000+ words.
- Wrote unit tests in Vitest, allowing for testing of UI components, Prisma queries, and TypeScript events.

Stock Prediction Model | *Python, Jupyter Notebook, Pandas*

- Built a machine learning model that predicts the rise and fall of the S&P500 Index price with historical data.
- Utilized the Random Forest Classifier algorithm to train the model based on data imported from Yahoo Finance.
- Manipulated and cleaned data by utilizing Pandas data frames and methods to ensure more accurate results.
- Wrote the model in Jupyter Notebook, which allowed for better data visualization and more accurate predictions.

Naturalization Test App | *TypeScript, MySQL, Node.js, Express.js, Supabase, SCSS*

- Developed a quiz app that simulates the civics test given during the U.S. citizen naturalization process.
- Queried a MySQL database hosted on Supabase with Node.js and Express to access 100+ questions and answers.
- Used TypeScript and SCSS to seamlessly animate website components and build an attractive UI.
- Tested on a small group of individuals studying for the real civics test; all users from the group passed the exam.
